

Auro Coin

This cryptocurrency is called "Aurocoin," and it is backed by physical gold and silver. Aurocoin was launched on April 5th , 2023 and is built on the Ethereum Blockchain. It is a decentralized autonomous organization. Meaning, its operations are managed by a group of stakeholders rather than a centralized entity.

The main idea behind Aurocoin is to create a digital currency that is stable, secure, and will hold its value over time. To achieve this, Aurocoin created tokens, ARB is a stablecoin which is backed by physical gold, and ARB is a governance token that allows stakeholders to vote on key decisions related to the platform.

Each ARB token is equivalent to one gram of .9999% gold, which is held in secure vaults. The gold is audited by an independent auditor, ensuring transparency and accountability. The same applies to the silver which also backs each token.

Each ARB token represents a proportionate share of the fees collected by the Aurocoin platform.

The advantages of an asset backed gold-backed cryptocurrency like Aurocoin are many. Firstly, it provides a stable store of value that is not subject to the volatility of the crypto market. Gold has been a reliable store of value for thousands of years, and its value is unlikely to fluctuate significantly in the short term. This provides users with the security and confidence that their investment will hold its value over time.

Another advantage of Aurocoin is that it provides an alternative to traditional investment vehicles like stocks and bonds. Gold has historically been a hedge against inflation, and its value tends to rise when other assets decline. This makes it an attractive investment option for those looking to diversify their portfolio.

Finally, Aurocoin is fully decentralized, meaning that there is no central authority controlling the platform. This ensures that there is no single point of failure or risk of censorship. It

also means that the platform can operate 24/7, without any downtime or disruption.

In conclusion, the first crypto token that is backed by gold and silver, Aurocoin, is a game-changer in the world of cryptocurrencies. It offers the stability and security of traditional investments while leveraging the benefits of blockchain technology. Its decentralized nature ensures that users can transact securely and confidently, without any fear of censorship or downtime. As the crypto market continues to evolve, it will be interesting to see how other

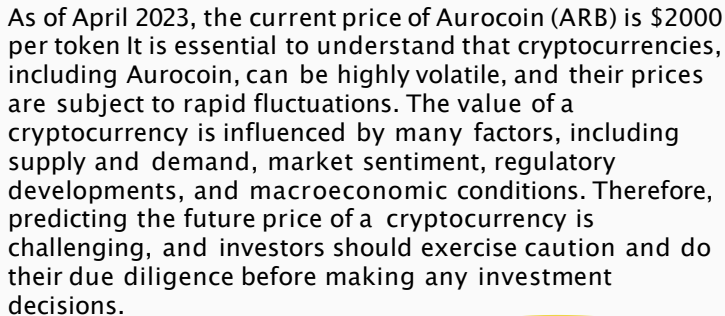

cryptocurrencies incorporate real-world assets to provide users with even more options and opportunities.

Cryptocurrencies have emerged as a new asset class in recent years, with thousands of different digital currencies now in circulation. One of the most notable cryptocurrencies is Aurocoin, a token backed by gold and silver. While the value of Aurocoin, like any other cryptocurrency, is subject to market forces, it has seen significant price fluctuations since its launch on April 5th, 2023.

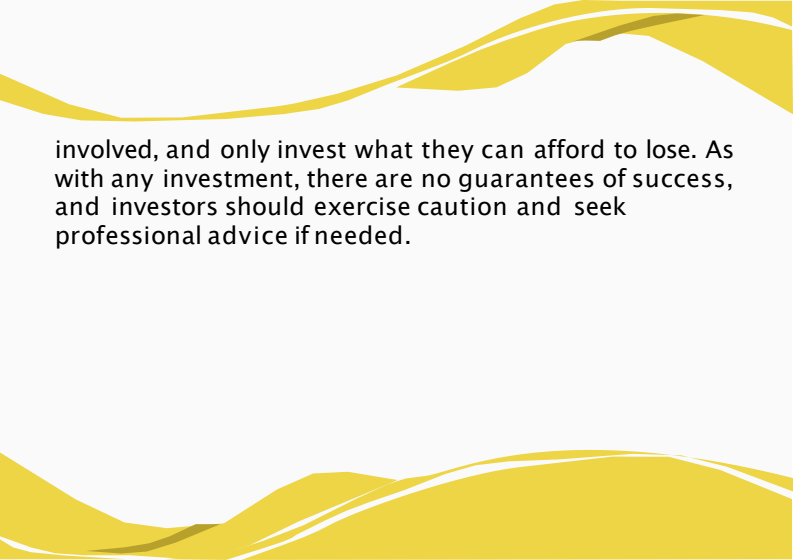

As of April 2023, the current price of Aurocoin (ARB) is \$2000 per token. It is essential to understand that cryptocurrencies, including Aurocoin, can be highly volatile, and their prices are subject to rapid fluctuations. The value of a cryptocurrency is influenced by many factors, including supply and demand, market sentiment, regulatory developments, and macroeconomic conditions. Therefore, predicting the future price of a cryptocurrency is challenging, and investors should exercise caution and do their due diligence before making any investment decisions.

That being said, some factors could potentially influence the price of Aurocoin positively. For example, the increasing demand for stablecoins, particularly those backed by real-world assets, could drive up the value of ARB. Additionally, if gold and silver prices rise, this could also impact the value of ARB positively.

In conclusion, while a resell price of \$2000 per token may be a significant increase from the current price of ARB, it is challenging to predict if and when this will happen. Investors should do their research, consider the risks

involved, and only invest what they can afford to lose. As with any investment, there are no guarantees of success, and investors should exercise caution and seek professional advice if needed.

The advantages of a blockchain-based exchange like Aurocoin are many. Firstly, it provides users with a stable and secure means of exchanging their tokens for real-world assets. This eliminates the need for intermediaries, reduces transaction fees, and enables fast and efficient settlement.

Secondly, a blockchain-based exchange like Aurocoin provides users with transparency and accountability. Because the platform is fully decentralized, there is no central authority controlling the platform, and all

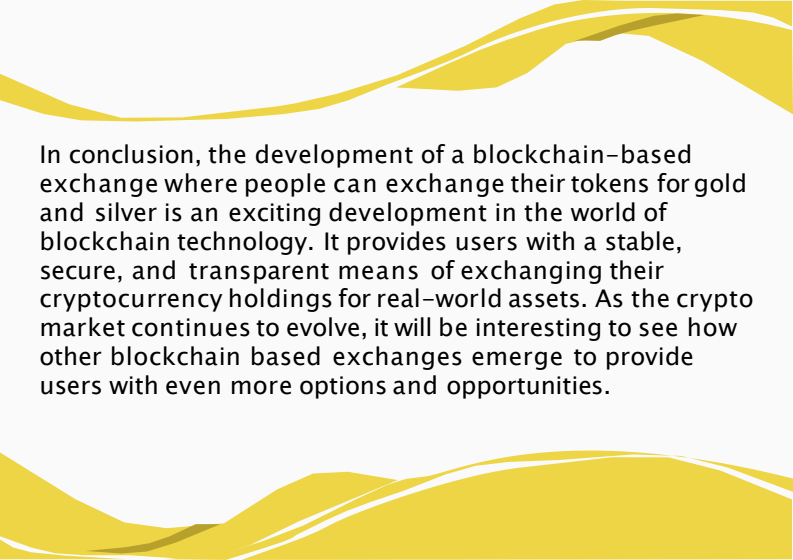

transactions are recorded on the blockchain. This ensures that users can transact securely and confidently, without any fear of fraud or manipulation.

Finally, a blockchain-based exchange like Aurocoin provides users with accessibility. Anyone with an internet connection can access the platform and exchange their tokens for gold and silver. This means that the platform is open to anyone, regardless of their location or financial status.

In conclusion, the development of a blockchain-based exchange where people can exchange their tokens for gold and silver is an exciting development in the world of blockchain technology. It provides users with a stable, secure, and transparent means of exchanging their cryptocurrency holdings for real-world assets. As the crypto market continues to evolve, it will be interesting to see how other blockchain based exchanges emerge to provide users with even more options and opportunities.

AMAZON MINING CHILE Ltd., I.B.C.

White Papers

Legal Disclaimer:

THE PURPOSE OF THIS WHITEPAPER IS TO PRESENT THE PROJECT OF POTENTIAL TOKEN SHAREHOLDERS AND PLATFORM USERS IN CONNECTION WITH THE PROPOSED TOKEN/COINAGE LAUNCH. THE INFORMATION SET FORTH BELOW MAY NOT BE EXHAUSTIVE AND DOES NOT IMPLY ANY ELEMENTS OF A CONTRACTUAL RELATIONSHIP. ITS SOLE PURPOSE IS TO PROVIDE RELEVANT AND REASONABLE INFORMATION TO POTENTIAL TOKEN SHAREHOLDERS IN ORDER FOR THEM TO DETERMINE WHETHER TO UNDERTAKE A THOROUGH ANALYSIS OF THE COMPANY WITH THE INTENT OF ACQUIRING SHAREHOLDER'S TOKEN/COINAGE OF, ONE OUNCE(oz.) .999 GOLD COINAGE, AS ONE "AURO BULLET" AND/OR ONE OUNCE(oz.), .999 SILVER COINAGE, AS ONE "SILVER BULLET".

IN THIS WHITEPAPER, IT SHALL NOT BE DEEMED TO CONSTITUTE A PROSPECTUS OF ANY SORT OR A SOLICITATION FOR INVESTMENT, NOR DOES IT IN ANY WAY PERTAIN TO AN OFFERING OR A SOLICITATION OF AN OFFER TO BUY ANY SECURITIES IN ANY JURISDICTION. THIS DOCUMENT IS NOT COMPOSED IN ACCORDANCE WITH, AND IS NOT SUBJECT TO, LAWS OR REGULATIONS OF ANY JURISDICTION WHICH ARE DESIGNED TO PROTECT INVESTORS. THE TOKENS OFFERED IN THE TOKEN SALE DO NOT PROVIDE ANY VOTING RIGHTS. THE STRUCTUREING OF PROFIT SHARE, DIVIDENDS OR OTHER EXPECTATIONS ON CURRENT OR FUTURE PROFITS CAN BE AND WILL BE ANTICIPATED BY PREFERRED SHAREHOLDERS AND COMMON SHAREHOLDERS.

CERTAIN STATEMENTS, ESTIMATES, AND FINANCIAL INFORMATION CONTAINED IN THIS WHITEPAPER CONSTITUTE FORWARD-LOOKING STATEMENTS OR INFORMATION. SUCH FORWARD-LOOKING STATEMENTS OR INFORMATION INVOLVE KNOWN AND UNKNOWN RISKS AND UNCERTAINTIES WHICH MAY CAUSE ACTUAL EVENTS OR RESULTS TO DIFFER MATERIALLY FROM THE ESTIMATES OR THE RESULTS IMPLIED OR EXPRESSED IN SUCH FORWARD-LOOKING STATEMENTS. THIS ENGLISH LANGUAGE WHITEPAPER IS THE PRIMARY OFFICIAL SOURCE OF INFORMATION ABOUT THIS SHAREHOLDER'S TOKEN LAUNCH.

THE INFORMATION CONTAINED HEREIN MAY FROM TIME TO TIME BE TRANSLATED INTO OTHER LANGUAGES OR USED IN THE COURSE OF WRITTEN OR VERBAL COMMUNICATIONS WITH EXISTING AND PROSPECTIVE SHAREHOLDERS, CUSTOMERS, PARTNERS, ETC. IN THE COURSE OF SUCH TRANSLATION OR COMMUNICATION SOME OF THE INFORMATION CONTAINED HEREIN MAY BE LOST, CORRUPTED, OR MISREPRESENTED. THE ACCURACY OF SUCH ALTERNATIVE COMMUNICATIONS CANNOT BE GUARANTEED.

THE SHAREHOLDERS RESERVE THE RIGHT TO CHANGE THE TERMS AND CONDITIONS SET FORTH IN THIS WHITEPAPER, INCLUDING ITS APPENDICES, AND THE GENERAL TERMS AND CONDITIONS AS PUBLISHED ON THE WEBSITE (BHSB.BIZ) AT ANY TIME WITHOUT PRIOR NOTICE.

IN THE EVENT OF ANY CONFLICTS OR INCONSISTENCIES BETWEEN SUCH TRANSLATIONS AND COMMUNICATIONS AND THIS OFFICIAL ENGLISH LANGUAGE WHITEPAPER, THE PROVISIONS OF THIS ENGLISH LANGUAGE ORIGINAL DOCUMENT SHALL PREVAIL. THE SHAREHOLDERS DO NOT ALLOW USERS TO AVOID CAPITAL CONTROLS OF ANY KIND AND DOES NOT ALLOW THEM TO INVEST IN ANY FOREIGN ASSETS.

NO PERSON IS BOUND TO ENTER INTO ANY CONTRACT OR BINDING LEGAL COMMITMENT IN RELATION TO THE SALE AND PURCHASE OF SHAREHOLDERS TOKENS AND OR OTHER CRYPTOCURRENCIES AND OR OTHER FORMS OF PAYMENT IS TO BE ACCEPTED FOR SHAREHOLDERS PRODUCTS AND SERVICES BASED ON THIS WHITEPAPER.

LETTER TO INVESTORS:

Greetings Investors,

My Name is _____, Investment Consultant
_____. Today brings to your attention an Investment Opportunity in the Mining Industry, coupled with an opportunity in the CryptoCurrency Blockchain Exchange, Investment World.

A "long-story short"; AMC, Ltd. is looking for instrument purchasers willing to invest in the mining of Gold, Silver, Sulfur, Titanium, Lithium (The Area is known as the "Lithium Triangle"), Rare-Earth Minerals (exploration of Atacama desert is huge), Silica (reaching levels of 99% purity), including world recognized Sulfur deposits.

The mine is located in Chile, Region III, Chanaral, this area of Precious Metals and other diversified Ore bodies have been field tested and verified. The mining properties have the ability to be developed/mined. Therefore, due to new means of raising capital, through fractionally allowing a modest investor the ability to profit, as in the past, only the institutional investors were able to increase their capital.

The development of funds for the preliminary steps of mining, i.e., the recovery process of precious metals, excavation of mineral rich ore bodies, and the process of bringing the minerals to market, can now be satisfied by means of; BLOCKCHAIN TECHNOLOGY INTERGRATING CRYPTOCURRENCY TOKENS/COINAGE, i.e., through Blockchain Exchange purchases under the laws and requirements of the "CryptoCurrency Security Backed Tokens/Coinage in Blockchain Exchange Offerings".

The shareholders and the fractional shareholders, e.g. [Share price is one million dollars for One Common Share, which has 500-one Oz. .999 Gold Coinage within that One Common Share]. The Preferred Shareholders have fractional shares of the one million in 1 Oz. Gold Coinage/Tokens. The share is purchased for one million dollars, which includes one Oz. Gold Coinage/Tokens. The Common Share Holder receives one million dollars in collateral fractional coins to be given to this team of intelligent focused partners, which have engineered the structuring of this monumental and groundbreaking concept, which will change this industry forever.

AMC's Common Share Purchaser of 1 share receives:

1. 1 Share is 500 one Oz. Gold Coinage
2. One million dollars in collateral from AMC's mineral rights in Coinage
3. Profits from AMC's Blockchain Exchange
4. Value increase through Speculators trading of AMC's Coinage

"The shareholders will hold value in the minerals manufactured and their sales from their own project." They will also be rewarded with the "Speculators" INEVITABLE increase in shareholders "limited" SHARE QUANTITY, on the corporate ledger for the decentralized nature of Blockchain Technology which allows for a secure and transparent ledger on all transactions. Additional to sale price increase by speculators, in the shares, the reward with dividends from the Block chain Exchange, and the dividends from sales of the Ore Bodies Natural Resources, all parties profit with this example.

Included in this Investment Package you will find the many reports detailing what has been found in the Piedra Amarilla Properties. The main reason for this Investment Proposal is to acquire the venture capital for the development of the project and [the] Mining Operation at the Piedra Amarilla Properties. (Note; be it recognized that the reports will seem somewhat dated, the values of the minerals have NOT been adjusted, yes the values you will review are at prices of twenty (20) years ago.) NOW as you look at the prices of today, you will be shocked. The prices and values of all Precious Metals, and Mineral Ore Bodies have increased in value considerably, so parallel that with the increases for the shareholders and trading ability in our markets today.

The estimated cost for the full development of this project is; \$350M - \$500M, Therefore, the Blockchain Exchange will exchange any and all CryptoCurrencies for a small fee, which will off-set the expense to engineer the advancement of the project, coupled with the plan to raise the venture capital through non-conventional means and new progressive funding methods within the parameters of Blockchain Technology.

Of course, we are not the first with the mission to secure funding through Blockchain Based Secured CryptoCurrency. AMAZON MINING CHILE LTD., has engineered a means of institutional investing at the private and public levels with the benefit of NOT involving "The World of Securities." However, currently there are not too many opportunities left for the individual. This opportunity allows average investors a chance to be invested in the financial development and operational profits in the real-life of a World Level Minerals Mining Project and "at the ground-floor level", as a "Common Shareholder and Share Fractional Ownership Token Holders."

Executive Summary

INTRODUCTION:

CryptoCurrency has changed the way financing and investing takes place in our World. In these last five (5) years the technology using financial concepts in conjunction with CryptoCurrency, and blockchain security systems, have emerged in the World of Business. Basically, the use of CryptoCurrency has made it easier for the average individual seeking funding, trying to raise capital and/or launch their own company's developmental projects, is a reality. In this proposal we have taken that next step from the past and conceptualized the new. The Cooperative postulation and conviction has been with us since business started among humans, we now have the opinion that cooperative ownership is ownership fractionally. In theory ownership, of a purchased 'token/coinage' is as if you are purchasing an asset, NOT an Investment Contract.

The token/coinage represents an instrument of value NOT an 'investment contract' and there are mineral reserves backing those instruments. These are in ground, as well as, extracted warehoused minerals, as the Mining Company develops the project. The exploitation, asset reports, and private, as well as, governmental appraisals, have already been paid for; by the Share Owners and Fractional Share Owners, as the tokens/coins are purchased. For development, operating expenses, extraction costs, and additional exploration outlay does NOT fall within a security transaction, where the investor's own actions largely dictate whether an investment will be profitable, then that investment is probably NOT a security.

The representation of the Howey Test looks at the investment's substance, rather than its form, as the determining factor for whether it is a security, and needs to be registered with the SEC, and this instrument of value will be known as a token/coin with a certificate of ownership, at the set price it was purchased for and amount purchased, of the mineral as named. Looking at the economic realities behind this investment, purchase of ownership (the Coinage/Token), and the ability for the share owners and fractional owners, to do what they feel needed with the tokens allowing for significant influence over how the investment in the tokens is managed, this clearly establishing NO need for SEC registering. The Mining Company is excavating the mineral(s) and the tokens which will be priced when purchased. The Fractional Owners, as Token Holders, will have the influence over the trading and sales of the Tokens.

With all that said, simply, imagine having an opportunity to be rewarded for helping raise money to fund a significant world recognized mining company's operation to recover consumable natural resources like **Titanium, Gold, Silver, Silica, Lithium, (Known as the "Lithium Triangle"), Rare-Earth Minerals ("Atacama Desert") and Sulfur (at "High Purity")**. All that is because of the indisputable facts that were drawn from the extensive review of the recoverable minerals, and the development feasibility studies concerning **Piedra Amarilla Properties** located in Chile. The launch of the ICO/IEO/STO to capitalize the exploitation and recoverability of the **AMC's** consumable mineral resources, is found within the **Piedra Amarilla** mining properties reports.

The token will have a purchase price and will be secured by the assets at time of purchase price, within the mining properties, of AMC's Piedra Amarilla Properties. AMC, will issue a token\coinage at time of purchase, place it on the Company's registry and then that token can be traded as requested by its owner and managed by AMC.

About the Token/Coin

- **Trade Compatibility**
- **Usage** - for any kind of purchase or trade
- **Storage Compatibility** - Included digital cloud for registered coins

AMC's Tokens/Coinage is an asset-backed CryptoCurrency that is secured by the recoverable consumable mineral assets developed by AMC, Ltd. on Piedra Amarilla Properties located in Chile, NOW OWNED BY AMAZON MINING CHILE, LTD.

RIGHTS OF TOKEN HOLDERS

Please note that acquisition of Amazon Mining Chile's, AMC Tokens/Coinage, an asset-backed cryptocurrency during the ICO/IEO/STO launch does "not" make you a shareholder or gives you any rights of entitlement to the company or the Mining Property.

The Challenge:

- How Do You Seek Investors/Sponsors/Fractional Owners/Partners, To Help Fund This Huge Opportunity Without Bringing In The Institutional Investment Groups?

The Solution:

- Create an Asset-Backed CryptoCurrency Token/Coinage; that is secured by highly sought after consumable minerals, precious metals, and significant industrial ore bodies as their assets.
- Find a Blockchain Exchange Technology.
- Then Initiate An ICO/IEO/or STO.

MISSION STATEMENT

The ICO/IEO/STO launch of AMC's Coinage/Tokens is to raise funds, to fully extract the mineral resources required, which will collateralize the enhanced purchased value for the AMAZON MINING CHILE LTD.; as a SHAREHOLDER or fractional owner and/or recipients of proportional amount of minerals from the profits, in "mineral valued tokens/coinage."

OBJECTIVE

The objective of the venture is to capitalize AMC'S, Mining of the Piedra Amarilla Properties, through; **AMAZON MINING CHILE LTD., utilizing** Tokens/Coinage, as an asset-backed CryptoCurrency Coin/Token, to launch a **ICO/IEO/STO** on a blockchain platform which is decentralized enabling the 'token/coin' 'crypto' 'smart contracts' to be designed and operated as required, to allow **Amazon Mining Chile Ltd.,** to develop, engineer, and operate the ONE (1) mineral property [71-AL-100], with the seven (7) additional properties which will be procured for future mineral assets with a return on profits, back to the Fractional Owners Purchasers and Shareholders of AMC's Coinage/Tokens.

In essence, the "collateral concept" in creating an asset collateral-backed CryptoCurrency Coinage/Token and using the consumable mineral resources as collateral to support the Token's purchase value allows the investors to see and understand that their **investment is not just 'bits on a computer'**. The CryptoCurrency coin/token will NOT be prone to wild valuation swings, market manipulation or exploitation because of the assets which will be backing it.

Tokenization of Real (Mining) Assets:

Since there are real assets backing Amazon Mining Chile Ltd., the assets need to be "mined" and will be under the control and ownership of AMC. The quantified percentages of profits, which will constitute from the Mineral Sales, and or from the recovered Ore bodies, and any of its byproducts located within and around the Piedra Amarilla Properties, owned, leased and/or controlled by the development company Amazon Mining Chile Ltd., I.B.C., will be determined by aforementioned.

When the Piedra Amarilla mining properties were purchased, gold was at \$275.00 oz. Today gold is approximately \$1,800.00 oz., and looks to go to over \$2,000.00oz...(All of the other accessible minerals in the project have significantly increased as well, which is worthy of your attention), Therefore, those who acquire Coinage/Tokens during the ICO/IO/STO launch will share in profits for funding the AMC project.

AMC's Blockchain Exchange, an additional capital structures:

The Piedra Amarilla properties presents an unprecedented mining opportunity that includes approximately 30% of known global Sulfur reserves, the host rock contains some of the world's largest known deposits of Titanium, and concentrations of Gold is projected to exceed \$24 billion, (522 million oz. in Gold) additional to, substantial quantities of Silver. Evaluation exceeds \$38 billion in indicated and inferred reserves, and additional billions in inferred reserves according to surveys prepared by The Ralph M. Parsons Company, independent assay groups, and the Government of Chile (In; 1988). Updated reports will confirm these prices have retained (and/or have had Huge increases) a 'viable financial permanence'.
